

RECYCLING & WASTE AUDIT | COMPOSITION AUDIT

Use this template to collect data while conducting your Composition Audit. Each of your refuse streams are made up of a variety of materials, and here you will highlight what those materials are and what percentage of each stream it accounts for. This is valuable information because it shows you where your problem areas are, whether or not you are using your current set-up appropriately, and where you have room to grow. [All of this will be factored in to the statistics generated by the resource center.](#)

Division	Stream	Materials	% of Stream	Notes
example building A	waste (100%)	waste	45%	
		glass	10%	
		plastic	5%	
		aluminum	5%	
		paper	10%	
		cardboard	5%	
		organics	15%	
		batteries	5%	
example building A	mixed recyclables (100%)	glass	10%	
		plastic	25%	
		aluminum	25%	
		cardboard	20%	
		paper	15%	
		waste	5%	
example building B	waste (100%)	waste	40%	
		glass	10%	
		plastic	5%	
		aluminum	10%	
		paper	5%	
		cardboard	5%	
		organics	25%	
example building B	mixed recyclables (100%)	glass	10%	
		plastic	20%	
		aluminum	15%	
		paper	30%	
		cardboard	20%
