Recommended Waste and Recycling Products

MISSION STATEMENT

To support everyone who cares about waste diversion with leading edge products and services that maximize the quantity and quality of their recycling program.

A MESSAGE FROM CRAIG BUSCH

Busch Systems® began in the early days of the recycling movement and the changes we have witnessed over our 38 years in the industry have been extraordinary. As the next generation seeks accountability to the significant environmental issues we are facing today, we are committed, more than ever, to supporting sustainable and eco-conscious business choices.

We are therefore very proud to have maintained our Certified B-Corporation® status since 2019. B Corporations are businesses that meet the highest verified standards of social and environmental performance, transparency, and accountability. In addition to receiving our B-Corp recertification in 2023, we joined the Social Recycling movement with Plastic Bank to help stop the equivalent of 2.2 million plastic bottles from entering the ocean and we began mapping the carbon footprint of our entire product line.

So what's in store for the future?

Look for the continued expansion of our product line including developments in new, cutting-edge container designs that promote signage and an expanded line of containers with post-consumer recycled content. Our Senior Advisor, Alec Cooley, continues to lead our Green Thinking Webinar Series, and his "Advancing Recycling" blog offers informative, relevant industry content. Project Rise, our environmental, customer-driven 'give-back' program has introduced new non-profits to add to the over 30k donated to date. All in all, the year ahead is full of exciting plans to share with our employees, clients and partners.

On behalf of all of us at Busch Systems®, we wish to thank you for being a part of our family for over 37 years!

Craig Busch

Founder, President & Chief Design Officer

We're committed to doing business for the greater good—that's why we're proud to be a B Corp™.

A Certified B Corporation® since 2019, we're one of over 4,000 companies across 74 countries and 150 industries redefining success in business. "We're honored to be a part of the B Corp community," says Craig Busch, President & CEO. "It lets us be bold about who we are and what we believe in—and to make greater impact in the world as a recycling & waste management industry leader." B Corporations voluntarily meet high criteria for social and environmental performance, accountability and transparency. We have committed to using business as a force for good, assessing the work that we do and the way that we do it, and continually implementing processes and practices that consider the impact our business has on all stakeholders – employees, customers, society and the environment.

**Working together to make a difference!
We are proud to have partnered with
CarbonGraph.**

Innovation is at the heart of what we do, and we are proud to have partnered with CarbonGraph, an innovative technology, to determine the carbon footprints of our products. Founded in 2021, CarbonGraph's mission is to provide people, companies and governments the environmental context needed to make informed decisions about the sustainability of the goods and services they buy and sell.

In addition to mapping the carbon footprint of our products, the Busch Systems team has been working hand-in-hand with the CarbonGraph team to develop their software and be an example of the steps other companies can take in measuring their environmental impact through data and technology.

To learn more about CarbonGraph, visit: buschsystems.com/carbon-footprint

In partnership with Plastic Bank, Busch Systems is directly contributing to five of the 17 United Nations SustainableDevelopment Goals.
(SDGs 1, 8, 12, 14, 17)

Plastic Bank empowers the Social Recycling movement that stops ocean plastic and helps alleviate poverty. Busch Systems is improving lives in ethical collection communities in collaboration with Plastic Bank and, in 2023, Busch Systems will help stop the equivalent of 2.2 million plastic bottles from entering the ocean in collaboration with Plastic Bank.

ASPYRE™ COLLECTION

EXCEPTIONALLY CRAFTED
WITH OUR CUSTOMERS IN MIND

With sustainability as a top priority at Busch Systems®, journeying into recycled plastic lumber was an obvious next step in our product development. We have been incorporating recycled materials into the production of our recycling and waste containers for many years with the goal of decreasing the need to source raw materials and reduce our environmental impact. To continue our commitment to sustainability we created the Aspyre Collection™, exceptionally crafted with the best recycled plastic lumber to suit the needs of our customers.
